

datAshur[®] PRO

A compact design with ultimate security

The datAshur PRO USB 3.0 flash drive's advanced security features deliver complete data security and guarantees maximum protection of your data at all times. The design of the flash drive includes a rugged extruded aluminium sleeve that is dust and water resistant to IP57 rating and crush resistant, protecting the drive from physical damage whilst keeping your data ultra-secure. Built-in the drive is a rechargeable battery allowing the user to enter a 7-15 digit PIN via the on-board keypad before connecting the device to a USB port. All data transferred to the drive is encrypted in real-time with military grade AES-XTS 256-bit hardware encryption.

Use it straight out of the box. The datAshur PRO does not require any drivers or software to be installed. It delivers drag and drop encryption, plug and play simplicity and can be used with any software or operating system.

In plain and simple terms, without the PIN there's no way in!

MAIN FEATURES

OS & platform independent

100% hardware encryption, platform/device independent - works with all operating systems.

Compatible with:

MS Windows, macOS, Linux, Android, Chrome, Thin Clients, Zero Clients, Embedded Systems, Citrix and VMware

Government accreditations

The datAshur PRO has been accredited to NLNCSA DEP-V, FIPS 140-2 Level 3 & NATO restricted level certifications.

Wear resistant keypad

Designed with protection in mind, the datAshur PRO wear resistant keypad hides key usage to avoid tipping off a potential hacker to commonly used keys.

Brute force hack defence mechanism

The datAshur PRO is intelligently programmed to protect against all forms of brute force attacks. If the user PIN is entered incorrectly 10 consecutive times then the user PIN will be deleted. All your data will remain on the device but now you can only access it by entering the admin PIN.

However, if you enter the admin PIN incorrectly 10 consecutive times, the PIN, encryption key and data will be lost forever. The device will revert to the factory default settings and will need to be formatted before use.

Auto lock

The drive automatically locks when unplugged from the host computer or power to the USB port is turned off and can also be set to automatically lock after a predetermined amount of time.

Independent user & admin PIN

Which makes it perfect for corporate and government deployment. If the user forgets their PIN, the drive can be unlocked by the admin PIN, the admin can then allow the user to set a new PIN.

Features

- Real-time military grade AES-XTS 256-bit full disk hardware encryption
- FIPS PUB 197 validated encryption algorithm
- FIPS 140-2 Level 3 certified
- NLNCSA DEP-V certified
- Certified to NATO restricted level
- PIN authenticated - supports independent user and admin PINs (7-15 digits in length)
- No software required - 100% hardware encryption
- OS & platform independent
- Works on any device with a USB port
- IP57 certified (dust & waterproof aluminium housing)
- Brute force hack defence mechanism
- Bootable - you can boot your OS from the drive
- Epoxy coated wear resistant keypad
- Tamper proof and evident design
- Super speed USB 3.0
- Unattended auto lock
- Drive reset feature
- Customisation services available

1. Red LED light

🔴 locked

2. Green LED light

🟢 unlocked

3. Alphanumeric keypad

4. KEY button

5. Blue LED light

when solid, the drive is connected to the computer, when flashing data is being transferred

6. Keyring

unscrew to add to keyring
